

Your major benefits using My_own Feng Shui – to enhance your productivity!

This relates to the Feng Shui part of the software “My_own Astro & Feng Shui”.

- **Understand impact of a property for the client real fast.**

Get a good overview of important topics even from afar – without having to spend a lot of time.

Either import the floorplan or a view from Maps on the Internet.

Use the display of magnetic North (for the year to consider) from the Internet – and graphically convert it to the alignment of the property, without any calculation necessary (so no errors possible this way).

Analyse the property according to a variety of Feng Shui methods.

If not sure about the situation, calculate and display a choice of Flying Stars and other issues side by side.

Calculate the BaZi (horoscope) for all persons involved in just a few minutes – and see their relationship to the property in various ways.

- **Optimize layout of building / rooms / furniture graphically and interactively.**

Import any layout from other documents, or create it using inherent capabilities of Excel.

Choose from a variety of methods to superimpose the layout with graphical objects from Feng Shui.

Immediately see the impact for the layout itself as well as for the inhabitants.

Place objects according to scale within the floor plan, move and turn around via mouse or touch.

Optimize alignment of furniture, starting either from theory or from practical considerations.

Work on it all by yourself - or together with the client: using Skype remote, or a tablet on site.

Work on it interactively (also switching back and forth between theory and view on the plan as much as you like) till both you and your clients are happy.

Easily transfer your results to Word, add comments, and export as PDF for documentation and report.

- **Impress your clients with a professional tool for professional results and report.**

Also store all project data for easy access later on when the client comes up with some new demands.

- **Have a lot of insight and also fun for yourself: work gets really playful using this tool.**

For more details and various graphical images see the product overview (PDF) at <http://my-own.pro/EN/>

For an online demonstration via Skype just write a mail (info@my-own.pro) to set up an appropriate date.

Get convinced by what you see – and bring your own data for that (floorplan / address / birth dates).

At the end of the presentation, receive a PDF with the main results according to your liking.
